The world of work is changing every day. The challenges of integrating people and space have never been greater. Company footprints are shrinking. Space is being reconfigured more frequently to optimise occupancy and reflect the changing requirements of businesses.

There is also increasing demand for office solutions that strike the right balance between the needs of people using their own workstations while working alongside colleagues.

That’s why Steelcase has introduced Fusion, a desking platform designed for the entire range of application in today’s workspace.

**Why Fusion?**

1 - It’s a desking family comprising work surfaces, storage, desk organisation and cable management.

2 - It’s a platform system that structures the whole office space, no matter what work styles are needed.

3 - It adapts to any company’s culture with its modern or traditional design.
Meeting the challenge of people and space

People working in pairs or small groups are delivering better results for companies at a time when the efficient use of space is crucial.

Staff also need individual workspace and the facility to organise it without facing mountains of files and documents on their desks or struggling with messy cable management. People and space, it’s a challenge that Fusion meets successfully.

Fusion brings together the elements of worksurface, storage, desk organisation and cable management and enables the user to enjoy a personally configured workstation that dovetails with their colleagues’ workspace. Fusion is an instant solution available in modern or traditional design, a choice of colours and with a range of storage solutions.

Installation in 30 seconds only

Office lay-outs are changing with increasing frequency. A desk system needs the flexibility to be assembled or dismantled easily and quickly. It takes only 30 seconds for 2 people for the basic installation of a Fusion desk which allows customers and users to reconfigure their office quickly - even over a weekend.

Worksurface
Available in various dimensions and materials. It enables the user to structure their office space flexibly and efficiently without using up unnecessary additional floor space.

Top level organisation
Partito rails and screens, SOTO™ and our 1+1 organisational tools provide privacy and enable the user to find a place for everything. The Plurio single monitor arm, easily adapts to the Fusion desk - users can manage more information in less time. Plurio can go from a single, to a dual, to a triple, to multiples screens.

Cable Management
The focus on Fusion’s easy installation and user comfort was a major factor in the development of the cable management system.

Legs
The worksurface/shared platform gives customers an aesthetic choice between C- or 4-leg.

Storage
The colourful storage units are an integral element of Fusion and provide individual or team storage. Units can replace a leg or be positioned next to the desk.
You, me, us

Fusion is a family of office furniture elements that can satisfy the entire range of applications required by companies in their office environments. It strikes the perfect balance between collaborative and individual work.
For a balanced work environment

People working in pairs is proving a successful arrangement for businesses. There is an increasing need to develop individual workspace that encourages the user to concentrate on its own work and interact with others without leaving their desks. This is the modern working environment that Fusion creates.

Fusion may also be configured in a more traditional office style. If they wish, customers can select their main choices from a range of table tops, legs, cable management, storage, desk organisation and an integrated and comfortable office solution will be created for them.

Users can also organise their own workplace with the addition of Partito rails and screens, lateral storage and handy 1+1 Worktools.

Straight top / 4-leg design / Cable apertures, large capacity cable tray / Duo lateral storage / Partito rail / Reply Air task chair.

Asymmetric corner top / Supporting pedestals / C-leg design / Cable aperture, large capacity cable tray / Partito rail / Reply task chair.
Comfort

At Steelcase, we use ergonomics to respect people’s different sizes and ways of working, designing the workstation for individual needs. We take a user-centred approach, asking people what they need and what they like, observing what they do. For many people ergonomics means sitting on a suitably adjusted chair.

But that is only part of the picture. It is also essential that the entire workstation is ergonomically sound. We have ensured Fusion succeeds ergonomically by being available with height adjustable legs.

Perfect for small and large teams

The drive to create more collaborative working spaces is gathering pace as companies recognise that people working in small groups are delivering improved, tangible business results. Fusion encourages and facilitates this way of working. The ergonomic credentials of Fusion will ensure user comfort while neat cable management will help create tidy workplaces and support greater cabling capacity. With the addition of Partito rails and screens, people can focus on their own work, communicate easily with their colleagues and at the same time help users with the organisation of their spaces.

Straight table top / Height adjustable C-leg design / Large capacity cable tray / Partito rail with 1+1 Worktools / 32 Seconds task chairs.

The height that’s right for you
Simply adjust your table to the desired height from 650 to 850mm.

Symmetric corner top / C-leg design / Cable aperture, large capacity cable tray, standard vertical cable management / Partito Screen with 1+1 Worktools / 32 Seconds task chairs.

Maximising people performance amongst large teams, particularly in call centres, is crucially important for businesses.

Pentagon table tops / C-leg design + shared leg / Cable aperture, standard vertical cable management, large capacity cable tray / Partito Screen with 1+1 Worktools / Reply task chairs.
Storage for all

People need quick and easy access to storage that helps keep workstations free from office clutter and help them manage active work, anticipated projects, archived information. Fusion has its own integrated storage, matching the design of the range. Thanks to its 1 or 2 sided door-opening, it can either be used for personal or shared storage.

Optima table top / Shared C-leg design / Top access, standard vertical cable management, large capacity cable tray / Duo lateral storage / Partito rail with 1+1 Worktools / Reply Air task chairs.

Personal and team storage solutions
Solo lateral storage: usable on one side.
Duo lateral storage: usable on two sides.
Fusion Bench

Fusion offers an excellent option for companies looking to optimise team spaces in their offices with the Fusion Bench solution.

Thanks to its contemporary shape, its simplicity and flexibility, Fusion Bench makes it easy to build larger configurations in team or individual spaces without compromising valuable square metres.

Worksurface
Available in various materials and dimensions.

Top level organisation
Partito rail and shelf.

Cable Management Solutions
On the desk, horizontally or vertically.

Legs
The Fusion Bench exists as 4-leg version.

Fusion Bench Straight freestanding + extensions / Vertical cable cover, Cable tray, Melamine Top access / Partito screen / 1+1 Worktools / Moby / Think task chair.
Individual and collaborative spaces

Fusion Bench encourages and facilitates collaborative working whilst at the same time enabling people to stay focused on their work. Individually or shared Storage solutions integrated into the structure help optimise space. Power and data is easily and quickly accessible in the desk.

Users enjoy the benefits of larger individual working surfaces and have peace and space to concentrate while working with colleagues.

Fusion Bench offers also the option of colourful storage units as integral elements. They provide individual or team storage. Units can replace a leg or be positioned next to the bench or desk.

Fusion Bench for 4 with Solo version 2 / Lateral Storage + Vertical cable cover, Cable tray, Top access / Partito rail / 1+1 Worktools / SOTO™ LED lamp / Share it / Please task chair.

Fusion Bench for 2 with Solo Storage / Cable tray / Top access / Partito rail / Worktools 1+1 / SOTO™ LED lamp / Reply Air task chair.
At the heart of your meeting room

Fusion covers the full spectrum of office requirements, including elegant and simple solutions for meeting and conference rooms. The elements can be easily adapted to provide a variety of configurations and are available with veneer or protech finishes. Fusion’s design and cable management also make the use of laptops and conference call facilities during meetings straightforward.
Fit for team leaders

While Fusion is suited to people working alongside colleagues, it can also be configured as a classic individual workstation, ideal for team managers.

Materials, such as veneer, create a prestigious yet functional appearance and integrated storage units help ensure the workstation enjoys a streamlined and uncluttered look.

A Fusion welcome

Fusion offers an intelligent and effective solution for office entrance areas, lobbies or reception counters.

A welcome counter can easily be attached to a desk and storage units. The result is a smart, colourful and tidy unit giving visitors an attractive welcome and all important first impression.
Pride of place

A tidy office is a dream that many companies and their staff would dearly like to fulfil. Cluttered desks and loose cables are all too often the main barrier.

Fusion’s desk organisation and a variety of cable management options help people and companies take a significant stride towards the goal of an office that is their pride and joy.

Worksurfaces can be selected with either rounded or straight edges and there is a choice of C-leg or 4-leg support. “On surface” cable management is available with outlet boxes and cut-outs. Horizontal and vertical management is provided through a range of unobtrusive trays, brackets, nets and spines.

Fusion’s design principles encourage structure and cleanliness and make a tidy office a realistic dream.

Organisation 3rd level / ergonomics

Partito Rail / Shelves and Screen are fixed via a C-clamp on Fusion Desks.

Partito Rail / Shelves and Screen are fixed on the structure.

Benching applications

Single, Dual, Triple and One over One... display supports.

Environmental performance

In 2000 Steelcase was the first company to apply the Life Cycle Assessment (LCA) within its industry, a method based on ISO 14040 / 14044 and selected by the European Union to quantify the environmental impacts of products throughout their life cycle: materials extraction, production, transportation, use and end of life.

We are transparently publishing the results of our LCA through an Environmental Product Declaration (EPD). You can ask for Fusion’s EPD and find out its impact on CO₂, waste and 6 other environmental criteria.

Continuous improvement: Fusion our latest environmental product generation

Thanks to the quantitative results of our LCA, we can set the stage for further improvements when designing or re-visiting products. Compared to Doue, our former desking generation, we significantly reduced Fusion’s impacts on three key areas: materials, transport and recycling.

Life cycle

End of life
99% recyclable.
Only one plastic (PP) easier to sort and recycle.
100% recyclable cardboard and LDPE film for packaging.
Quick and easy disassembly: snap fit system for most of the assemblies.
Separation of all the materials in 2’20 with simple tools.
Plastic parts clearly labelled for easy sorting and effective recycling.

Materials
21% recycled content by weight.
No hazardous materials.
Plastic parts are only made of PP (releasing less CO₂ than most of other plastics).*
Packaging: LDPE film and expanded PE (30% recycled content), cardboard (45% recycled content).
Water-based inks without solvent on paper and packaging.

Production
ISO 14001 certification for the Rosenheim (Germany) and Wisches (France) sites.
Powder-coat painting: VOC-free and free of heavy metals.
Water-based glue.

Use
Designed for a long product life.
Replaceable parts.

Transport
Manufactured close to customers, in Europe.
Minimized packaging weight and volume: only 2 boxes compared to 3 for Doue, to reduce the number of trucks:
- less CO₂ emissions (53 tonnes CO₂-eq avoided / year**),
- less fuel (13 000 litres avoided / year**).

You require official certifications. We can deliver them.

EPD Environmental Product declaration (EPD). Based on ISO/TR 14025, its purpose is to communicate precise and verifiable information about a product’s impact on the environment at all stages of its life cycle.

“NF Environment” certification. Based on ISO 14024, this French voluntary certification mark is awarded to products that have a reduced effect on the environment.

PEFC The wooden components are labelled with PEFC (Programme for the Endorsement of Forest Certification), ensuring that wood originates from sustainably managed forests.

E1 The particle boards comply with the low emission “E1 standard” and even the new “EO,5”, guaranteeing a very low level of formaldehyde emissions.

You care about the end of use of your furniture. We offer options - be it refurbishing, take-back, charitable donation or recycling.

Visit steelcase.com to discover more about Steelcase’s unique ecodesign strategy.
